KOMAL PREET KAUR

Cloud Computing | Python | TensorFlow | Data Analytics | Flask | AWS EC2 | AI/ML Engineer

preetkomal4074@gmail.com | +91 96719 38465 | GitHub: Kkomal12343 | LinkedIn: komal

SUMMARY

Cloud-focused professional with hands-on experience in AI, machine learning, and data science, combined with a strong foundation in networking and cloud infrastructure. Experienced in building and deploying scalable applications on *Amazon Web Services* and familiar with Microsoft Azure. Proven ability to develop AI-driven solutions and implement them in real-world environments. Continuously learning and adapting to deliver efficient, secure, and scalable technology solutions.

EDUCATION

B. Tech in Artificial Intelligence & Data Science *2025*
Chandigarh Group of Colleges (CGC), Landan – Punjab Technical University **CGPA: 8.1/10**

Senior Secondary (CBSE) *2021*
Sant Nischal Singh Public School, Yamuna Nagar **Percentage: 76%**

Matriculation (CBSE) *2019*
Sant Nischal Singh Public School, Yamuna Nagar **Percentage: 78%**

TECHNICAL SKILLS

- **Programming:** Python, C++, Core Java, SQL, R, HTML, CSS, JavaScript
- **Cloud & Tools:** AWS EC2, Git/GitHub, Jupyter, Google Sheets, MS Azure
- **ML & Libraries:** Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch
- **Visualization:** Seaborn (Advanced), Matplotlib, Plotly, Tableau, Power BI
- **Frameworks:** Flask, Django, ChatGPT API, LangChain/AgentGPT (Beginner)
- **Databases:** MySQL, MS Access
- **Competencies:** Data Structures & Algorithms, Object-Oriented Programming, Google Tools, Web Master Tools.

INTERNSHIPS & EXPERIENCE

Data Science Intern **Born Tech Solutions** | *June 2025*

- Prototyped a food service chatbot using the ChatGPT API, prepared data and prompt flows for common customer queries.
- Analyzed order history, feedback, and demographic data to identify purchase patterns and seasonal trends.
- Built classification models (Logistic Regression, Random Forest, Decision Tree, SVM) and improved baseline accuracy from **65% to 75%** via cross-validation and feature tuning.
- Created EDA notebooks and visuals to drive team discussions and validate assumptions before model changes.

Data Analyst Intern **CS Soft Pvt. Ltd.** | *May 2023 – Jun2023*

- Automated deep cleaning of medical and operational datasets using Pandas, replacing manual spreadsheet work, improving team efficiency by **20%**
- Developed reusable Python scripts for data preprocessing and quality checks; supported internal reporting dashboards.
- Collaborated with a mentor for code review while independently owning most scripts.

Software Development Intern **Absolute IT** | *June 2022 – July 2022*

- Built backend authentication workflows in Flask (login, signup, password reset).
- Diagnosed and fixed logic issues across request handlers and form validation to reduce runtime errors.
- Coordinated with frontend contributors to ensure smooth data flow between UI and backend.
- Reduced memory usage and increased execution speed by over **15%**

PROJECTS

AI-Powered Food Services Chatbot (with AWS Deployment) **Technologies:** Python,Flask/Django, AWS

- Built a multi-turn GPT-4 assistant for menu browsing, order placement, and instant support.
- Implemented a secure, context-aware backend (auth, conversation memory, cart/order APIs) and a clean Node.js chat UI to maintain natural flow.
- Added personalized recommendations from prior orders and menu metadata to boost engagement and upselling relevant items.
- Reduced manual support tickets by **27%** (average per day 22 to 16) after adding in chat FAQs and live order tracking.
- Configured cloud networking and security settings (security groups, access permissions) to ensure smooth and secure operation.

Disease Prediction Model **Technologies:** Python, Scikit-learn, Pandas

- Implemented Random Forest, Decision Trees, and Logistic Regression on structured clinical data
- Achieved **70%** accuracy.
- Applied cross-validation and GridSearchCV for hyperparameter tuning to improve generalization.
- Delivered the solution as a Jupyter notebook with clear EDA, model comparison, and conclusions.

COVID-19 Live Dashboard **Technologies:** Python, Plotly, Pandas, APIs

- Built an interactive dashboard with real-time stats and dynamic filters by country and time window.
- Implemented data cleaning and transformation pipelines; presented trends and hotspots via interactive charts.
- Shared among classmates for tracking local and global case trends.

CERTIFICATIONS

- Certificate of Merit — Naukri Campus Young Turks
- 5-Star Rating in Python for AI/ML — HackerRank
- Certified in Wireless Ad Hoc & Sensor Networks
- Clean, transform, and load data in Power BI — Microsoft Learning
- Playbook for AI Excellence: Training and Assessment — Oracle
- AI certifications — LinkedIn Learning
- AWS Training & Certification — Amazon

AWARDS & ACHIEVEMENTS

- Top 5 in CodeChef Campus Contest 2024
- State-Level Gold Medalist – Powerlifting | Silver Medalist — Weightlifting
- 1st Prize – State-Level Painting Competition — (2019, 2020, 2022)
- Published ML article on Medium — 2018
- Silver Community Service Award
